Total Teen Workflow

- Patient checks in at clinic
 *Caregiver consents and patient assents, if required by organization
- Patient completes the Total Teen assessment on iPad during vital check
- Provider discusses Total Teen mental health and sexual and reproductive health scores with patient

If patient scores at risk for sexual and reproductive health (SRH) needs (SRH score of 3+) or requests SRH services

Follow both paths for patients indicating need of both SRH and MH services

If patient scores at risk for Mental Health (MH) needs (PHQ-9 score of 10+), or requests MH services

- Patient receives SRH micro
 visit with PCP *Patient receives
 SRH services (like STI testing), if
 needed and available
- Patient receives MH micro visit with mental health provider
- Patient receives SRH referral, if needed per provider recommendation
- Patient receives MH referral, if needed per provider recommendation
- Provider schedules a follow-up visit, if needed
- Provider schedules a follow-up visit, if needed

Provider ends
Total Teen visit

Provider ends
Total Teen visit

At any point, patients may opt out of micro visits, in which case they proceed with their regularly scheduled visit.
