1

Explain assessment results to the adolescent.

2

Ask the adolescent if they have ever discussed SRH of MH with another provider.

If patient say "No" + Results = No to Low Need

- Ask the adolescent if they would like to talk to another healthcare provider.
- Briefly discuss ways the adolescent can maintain their SRH and MH.

If patient say "No" + Results = Moderate to High Need

- Recommend the adolescent complete a micro visit to address urgent needs and discuss follow-up services.
- If the adolescent agrees to participate, perform micro visits for SRH and MH separately.
- Provide referrals to appropriate specialists or schedule follow-up appointments as needed.

If patient say "Yes" + Results = No to Low Need

 Ask the adolescent how they like their specialist and if they feel that they benefit from the service.

If patient say "Yes" + Results = Moderate to High Need

- Ask the adolescent how they like their specialist and if they feel that they benefit from the service.
- Recommend a micro visit as needed if patients are interested.

3

Encourage the patient to ask questions and discuss concerns they may have.

Recommend or provide adolescent-friendly resources.

NOTE: The preceding pathways should be used for both SRH and MH.
